About Me

Full Stack Web Developer, specializing in Front-end technologies, with **1.5 year of experience** in IT industry. I am trained in **HTML, CSS, JavaScript, jQuery, React.js, Node.js and Express.js**, with intermediate knowledge in **MongoDB**. I like to build **user friendly** and **responsive designs**. Seeking to work in a creative role where I can use my skills to **solve real-life problems** and design attractive and compelling websites

Personal Projects

Portfolio website: prithwish.free.nf

- Built a **responsive portfolio** website **from scratch** using HTML, CSS & JavaScript.
- Used **CSS animations** and **typed.js** for visual appeal.
- A **contact form** captures the user response in a **google sheet**.

Weather webapp: weatherquery.free.nf

- **Responsive** weather app with **current weather** and **4 day weather forecast** for **any city**.
- Used **Openweather API** for weather details.

Memo-Random: memorandom.free.nf

- **Responsive** Note taking app with **add, delete, and edit** features.
- The memos **will not be deleted** on page reload.
- **Last update time** refreshes on adding, deleting and editing memos.
- Switches between the main and About section **without page reload**.

myChat: mychatweb.free.nf

- **Responsive Real time online chat application**.
- Made using **Node.js** and **Socket.IO**
- **Multiple people** can join the conversation. All others present are **notified once someone else joins**.
- **Sender names** and **timestamps** of messages are shown.
- In future, I will be implementing database and storage feature, multimedia messages, and also saving of users as Contacts..

E-commerce Dashboard: bit.ly/ecom-dashboard

- Currently working on a **dashboard** where we **manage account** and **products** of an e-commerce company.
- **Front end** is written in **React.js** and **back end** in **Node.js**
- Made an **API** in Node.js for **user registration and login**.
- User cannot access product pages until he is logged in. Once logged in his details will be saved in local storage until he logs out.
- User details are saved and retrieved from a **MongoDB database**.
- In future, I will be adding product details and will implement adding, updating and deleting features along with search facility.
